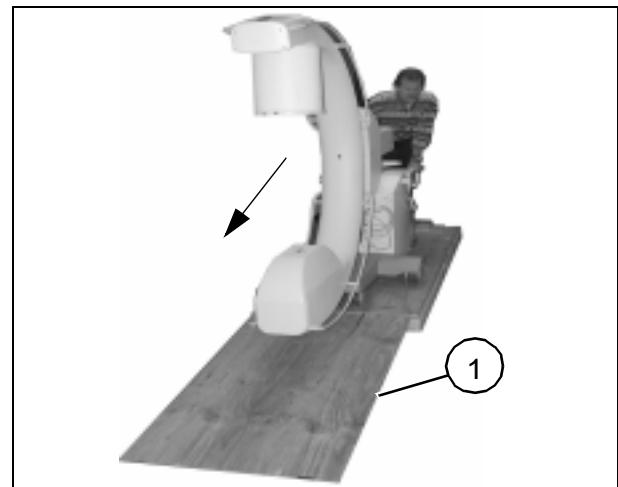

Fig. 6

- Unscrew supporting blocks (1/Fig. 6) on both sides and remove.

Fig. 7

- Firmly attach unloading ramp (1/Fig. 7) with nails (accessory pack mounted at the ramp) to pallet.
- Release foot brake.
- Move system from pallet in direction of arrow.

## Concluding Work

**ATTENTION**

In order to avoid damage caused by high relative humidity, do not put the POWERMOBIL into operation immediately. In extreme cases, it can take up to 24 hours before the POWERMOBIL should be turned on (e.g. transport temperature -20° Celsius and very high humidity in the customer's operating rooms).

- The monitor trolley should be unpacked if this has not been done.
- Prior to start-up, let the system adapt to its environment.
- Perform the system start-up according to the instructions outlined in the POWERMOBIL Start-up manual.
